RE: Substantial Modification to DRiV Industrial Wastewater Discharge Permit
City of Hartwell Pretreatment Program

Dear Mr. McDowell;

The City of Hartwell is requesting permission to make a substantial modification to the DRiV Industrial Wastewater Discharge Permit. The permit changes are necessary due to the closure to their facility except for one process.

The changes to the permit include:

1. The Monthly Average Flow limit for Outfall 001 is changing from 0.2 MGD to 0.05 MGD.
2. The Daily Maximum Flow limit for Outfall 001 is changing from 0.3 MGD to 0.075 MGD.
3. The following parameters' monitoring frequency in Outfall 001 is changing from Quarterly Monitoring to Semiannual Monitoring.
 - a. Ammonia Nitrogen
 - b. BOD
 - c. COD
 - d. Total Phosphorus
 - e. TKN
 - f. Cadmium
 - g. Copper
 - h. Lead
 - i. Nickel
 - j. Silver
4. The following parameters' monitoring frequency in Outfall 001 is changing from Monthly Monitoring to Quarterly Monitoring.
 - a. TSS
 - b. Chromium, Hexavalent

5. The only limit change is for Zinc in Outfall 001. The monthly average concentration limit is being changed from 0.79 mg/L to 1.41 mg/L. The one process that is going to potentially remain at the site for the near future utilizes zinc and will be harder to treat because the other wastewaters that used to be present are no longer present and the processes have been removed from the location.

Please let the City know about the public notice requirements for this substantial modification.

Should you have any questions or need any additional information, please call Goldie Associates at (864) 882-8194. Ext. 117.

Sincerely,

GOLDIE ASSOCIATES
